Country ranks 50th in global innovation index 2020

The long wait is finally over. The Philippines rose to rank 50th in the Global Innovation Index 2020, a symbol of hope for the country that is currently fighting the pandemic brought about by COVID-19. This is indeed a remarkable performance for the country considering there were 131 economies ranked in 80+ indicators grouped into innovation inputs and outputs and the Philippines was in rank 100th way back in 2014.

Moving up four notches from 54th in 2019 and scaling up by 23 steps from the 73rd ranking in 2018; the GII 2020 report shared that the Philippines performed on innovation above expectations for its level of economic development for the second consecutive year. The country ranked 41st in terms of innovation outputs from 42nd in 2019 and 68th in 2018. Also this year, the Philippines jumped to rank 70th in innovation inputs from 76th in 2019 and 82nd in 2018. The Philippines, likewise, scored high in all seven (7) GII pillars which are above average for the lower middle-income group, coming in at rank 4th among the 29 lower middle-income group economies. The other pillars and their respective ranking of the Philippines are the following: knowledge and technology outputs (26th), business sophistication (29th), creative outputs (57th), infrastructure (63rd), market sophistication (86th), human capital and research (86th), and institutions (91st). Furthermore, the Philippines, together with other three economies namely China, Vietnam, and India, made the most significant progress in the GII innovation ranking over time. Innovation in various fronts According to the GII 2020 report, the Philippines stood out in the areas of innovativeness of its business sector and the innovation outcomes produced by its investments, with the levels of outcomes that even surpassed some high-income economies. Compared to other economies in Southeast Asia, East Asia, and Oceania, the Philippines performed above average in the pillars of Business sophistication and Knowledge and technology. This overall performance earned the Philippines rank 11th among the 17 economies in the said region. The Philippines was also cited to be well-integrated into the global trade, being tagged as top 1 in rank in High-technology imports, 3rd in High-technology exports, and 8th in ICT services exports. Further on, the Philippines was rank 10th in the Creative goods exports. As the tale of the tape unfolded, the report disclosed that the country performed beyond expectations as it grabbed rank 6th in Productivity growth, rank 7th in Firms offering formal training, and rank 8th globally in the area of Utility models by origin. For the Human capital and research pillar, the Philippines posted rank 22nd in the category of tertiary education in terms of graduates in science and engineering. The DOST may be considered as vital contributor to this pillar with its scholarship programs like the Accelerated Science and Technology Human Resource Development Program (ASTHRDP) and the Engineering Research and Development for Technology (ERDT) being implemented by the DOST-Science Education Institute. The country's innovation profile shows top

DILG looks to support biking as alternative transportation

The public should consider active transport, such as walking and biking, as alternative modes of transportation amid the COVID-19 crisis according to the Department of the Interior and Local Government (DILG) as it urges local government units (LGUs) to construct protected biking lanes and walking paths as part of the recently signed Joint Administrative Order (JAO) 2020-

DILG Secretary Eduardo M. Año said that public mass transportation, unfortunately, has become vulnerable to coronavirus transmission despite the health protocols in place which is why walking and biking must be encouraged for they "present less contact among the populace leading to less opportunities for infection." "Data from the ground show that the public transport system can be a breeding ground for COVID-19 transmission kaya patuloy ang ating paghikayat sa mga LGU na magtayo ng walking paths at bike lanes.

(From page 1) and Highways (DPWH) sa mga hamon ng pandemyang ito kaya sana ay makuha natin ang pakikisisa ng mga pamahalaang lokal," he said.

The JAO also provides minimum public health standards for active transport users, such as the use of face masks and physical distancing.

DILG Undersecretary and Spokesperson Jonathan E. Malaya said that active transport is a welcome addition and a supplementary mode of transportation, which, according to him "hits many paraan ng pagtugon natin

Ito po ay para matiyak din na ligtas ang mga mamamayan sa kanilang paglalakad o pagbababike," Año explained.

"At ngayon nga na we have signed a JAO with other agencies, we urge the LGUs to see this as an urgent matter para magamit na agad ng mga tao," he added.

Año said that the DILG recently signed JAO 2020-0001 with the Department of Health (DOH), Department of Transportation (DOTr), and the Department of Public Works

"to address the limited transportation options for essential travel and curtail transmissions in public transportation."

He said that the JAO urges NGAs and LGUs to construct protected bicycle lanes and walking paths and supportive infrastructure like bicycle racks and changing rooms to encourage walking and cycling.

"The COVID-19 crisis is pushing us to be adaptive at itong paglalagay ng mga bike lane at walking path ay isang paraan ng pagtugon natin

National Health care prioritized by Bayanihan 2

The Department of Health (DOH) today reported that the Bayanihan to Recover as One Act or Bayanihan 2 has allocated about PHP 53.48 billion--almost half of the 165 billion stimulus package--for the support of healthcare workers (HCWs), sustaining the drive of the DOH and keep HCWs protected while at the same time preventing the influx of patients into hospitals.

The first phase of the Bayanihan One Act, also known as the Bayanihan to Heal as One, provided medical frontliners with personal protective equipment, accommodations, and risk allowances, among other benefits, as well as recruiting more of their colleagues to help them in their daily duties. Bayanihan 2, on the other hand, will concentrate on

primary care and the improvement of the health system and its attendant benefits.

Health Undersecretary Maria Rosaro Singh-Vergeire explained how Bayanihan 2 built on the accomplishments of Bayanihan 1, while continuing to fortify the response of the public and private health sectors against the economy. "Bayanihan 1 was a call to both our public and our medical communities to unite in a common vision to bring healing to our coronavirus-besieged sectors," she said.

"Bayanihan 2 takes the next steps forward in consolidating that healing through recovery, which is made possible by strengthening our health system structures while heeding the call of our HCWs for

assistance and provisions."

Usec Singh-Vergeire further emphasized the paramount role that medical frontliners play in curbing the spread of the virus, and the reason why their health and safety must be prioritized.

She said, "Our doctors, nurses, and medical and health staff are our last line of defense and they need us more than ever.

Through the Bayanihan to Recover as One Act, we look forward to further equipping our health system to not let anything hinder them from fulfilling their passion to heal and save lives."

In total, PHP 4.5 billion was allocated for temporary medical isolation and quarantine facilities, field hospitals, and expansion of government hospital capacity all over the

country. This includes the P180 million that was set aside to pay for dormitories, located in 12 COVID-19 referral hospitals, where frontliners can conveniently take a rest or sleep after their shifts.

About PHP 2.35 billion was spent on the HCV's accommodations, transportation, and meals, providing them respite from their day-to-day expenses while serving in the line of duty.

The PHP 0.27 billion allocation will cover all HCWs who contracted COVID-19 from February 1 onwards. Specifically, provisions for an infected HCW will be PHP15,000 for mild or moderate cases, PHP 100,000 for severe or critical illness, and PHP 1 million in the event of death.

According to Usec. Singh-Vergeire, the help and support for the medical frontliners are critical in the nation's response to the health crisis.

"Hindi pwedeng magitigil ang suporta natin para sa ating healthcare workers. Kung kailangan natin sila sa panahon ng pandemya, mas lalong kailangan rin nila ang tulong natin ngayon. Pinaka-importanteng magtutulong tayong lahat sa krisis na 'to," Usec. Singh-Vergeire stressed. Source: DOH

DPWH rushes completion of Villamor Air Base Quarantine Facility, 2 other facilities in Pasay City

A 72-bed capacity quarantine facility is ongoing as part of the 23 additional facilities being implemented by DPWH to augment COVID-19 bed capacity in Metro Manila.

"As of now, 15 container vans were delivered on site and we have accomplished 45 percent of the project," said Secretary Villar.

DPWH National Capital Region is also converting 40 container vans into a 160-unit room quarantine facility near WMar along Macapagal Avenue in Pasay City which is now 75 percent completed.

Another project which will have 276 cubicles, and five (5) nursing stations is ongoing at the Folk Arts Theater. The project is. Source: DPWH

DILG looks to support biking as alternative transportation

(From page 1) wrong if we will give walking paths na ito,” Malaya said. walking paths na ito,” Malaya said. walking paths na ito,” Malaya said.

He said that walking and biking opens up various benefits for the health of an individual; contribute to less air pollution; address and help in easing public transportation; and, most importantly, decrease the likelihood of COVID-19 transmission.

“We will not go

fits of, and contains technical instructions, including a template ordinance, implementation plan, communication materials, and a monitoring and evaluation plan for a successful bicycle lane network.

Network of Cycling Lanes

Prior to the issuance of the JAO, Malaya said that the DILG issued Memorandum Circular 2020-100 in July stating the guidelines for the establishment of a network of cycling lanes and walking paths to support people’s mobility.

“With the limited modes of transportation of street space, prioritizing the available today, people

users, and ensuring that people of all ages and abilities can access services in the locality.

Malaya said that LGUs should revisit their existing Local Public Transport Route Plan (LP-TRP) to properly plan, identify, and adopt the appropriate engineering and infrastructure solutions of designated local roads to be converted or redesigned for cycling lanes and walking paths.

To ensure proper support for active transport, he recommended LGUs to enact policies and ordinances, and prescribe rules and regulation on the use of roads. Source: DILG

SABAYANG PATAK KONTRA POLIO

Pabakunahan ang lahat ng batang wala pang limang (5) taong gulang laban sa polio. Abangan ang pagbabakuna sa inyong lugar. Tandaan, walang gamot sa polio. Tanging bakuna lamang ang pinakamabisang paraan upang maiwasan ito.

BAGO PA MAN NAGKARON NG COVID-19 SA PILIPINAS, MAY OUTBREAK NA NG POLIO SA ATING BANSA.

SABAYANG PATAK KONTRA POLIO

Pabakunahan ang lahat ng batang wala pang limang taong gulang laban sa polio, nabakunahan man o hindi pa. Libre, ligtas, at epektibo ito.

Walang gamot sa polio. Tanging bakuna lamang ang pinakamabisang paraan para maiwasan ito.

Abangan ang **pagbabakuna sa inyong lugar.**

City Government of Bacoor

Isa na namang pagpapakita ng malasakit ang ipinaramdam ng SK San Nicolas I sa kanilang mga ka-barangay. Naghahandog sila ng libreng pag-xerox at printing sa mga mag-aaral sa kanilang lugar para sa modules na kanilang gagamitin sa parating na pasukan. Namigay din sila ng face masks at vitamins sa mga frontliners at health workers sa kanilang barangay at namahagi ng kahon-kahong mga bond papers at expanded envelopes sa mga paaralan na malapit sa kanilang lugar. Salamat SK San Nicolas I. Tunay na maipagmamalaki kayo ng Lungsod ng Bacoor!

Country ranks 50th in global innovation index 2020

(From page 6)

25 rankings for other indicators like market capitalization, research talent in business enterprises, and high-technology manufacturing. Under these indicators, the DOST exhibited tangible initiatives as it continuously strengthened one of its flagship programs, the Small Enterprise Technology Upgrading Program (SETUP), geared at providing technical and financial assistance to micro, small and medium enterprises in the regions. Records revealed that from 2017-2019, the total budget amounting to \$213.2 million was shared by SETUP, the Science for Change Program, and the DOST Grants-in-Aid.

change In hindsight, the creation of the Science for Change Program (S4CP) in 2012 was somehow providential as it now carries the torch for the DOST in its thrust to push innovation to the limits through research and development. The S4CP has a unique strategy that involves the adoption of science, technology, and innovation (STI) by proportionately spreading financial support across all regions in the Philippines and by implementing capacity-building initiatives in partnership with academic institutions and industry stakeholders, thus creating a vibrant innovation ecosystem. The Science for Change Program (S4CP) is composed of four major components, namely: Niche Centers in the Regions for R&D (NICER) with total R&D investment of P856 million already as of the first semester of 2020; Collaborative R&D to Leverage Philippine Economy (CRADLE) with total investment of P 200 million as of July 2020; R&D Leadership (RD-Lead) Program with 32 RD leaders composed of scientists, researchers, and engineers now working in 14 regions and hosted by 30 research institutions; and the Business Innovation through S&T (BIST) for Industry Program that has already financed one (1) project involving production of pharmaceutical grade ingredients worth P 11.7 million and established 18 industry consultations in the first half of the year.

competitiveness by harnessing the power of science, technology, and innovation.

It also paved the way for the establishment of the National Innovation Council (NIC) that works on a whole-of-government approach involving the coordination and collaboration of the different agencies of government to greatly improve the country’s innovation governance and create synergy.

Lastly, under Section 28 of the Act, the National Economic and Development Authority (NEDA), in close coordination with the Department of Science and Technology (DOST) and the Department of Trade and Industry (DTI), were mandated to prepare the Philippine Innovation Act’s Implementing Rules and Regulations (IRR).

The Global Innovation Index ranks world economies according to their innovation capabilities.

The Global Innovation Index (GII), which is on its 13th edition, is co-published by Cornell University; INSEAD, one of the world’s leading and largest graduate business schools; and the World Intellectual Property Organization (a specialized agency of the United Nations). The report provides an annual ranking of the innovation capabilities and performance of different economies around the world. (Rodolfo P. de Guzman/S&T Media Service)
